

Retaining magnets

disc-shaped, with bore or female thread

SPECIFICATION

Housing

Steel, zinc plated

Materials of the magnet:

Version with bore

Hard ferrite **HF**

temperature resistant up to 200 °C

NdFeB **ND**

Neodymium, iron, boron

temperature resistant up to 80 °C

SmCo **SC**

Samarium, cobalt

temperature resistant up to 280 °C

Version with female thread

Hard ferrite **HF**

temperature resistant up to 200 °C

INFORMATION

Retaining magnets GN 50.4 are a shielded magnetic system.

To ensure that the magnetic properties (adhesive forces) are not impaired, the fixing screws must be made of **non-magnetic** material (magnetic not conductive).

- More information to retaining magnets (see page 2022)

ACCESSORY

- Holding discs GN 70 (see page 2051)

- Adhesive discs GN 70.1 (see page 2051)
