

Fixed handles

Technopolymer, easy cleaning

MATERIAL

High-resilience polyamide based (PA) technopolymer. White similar to RAL 9002 (CLEAN), glossy finish.

STANDARD EXECUTIONS

Plain blind hole.

The elastic coupling, by press-fit assembly on h9 tolerance drawn stock bars, is not affected by vibrations and prevents the handle from slipping off (see Dati Tecnici a pag.).

FEATURES AND APPLICATIONS

This handle, thanks to its white colour and glossy finish, is particularly suitable for applications on medical and hospital equipment and on food processing machines whose parts, for hygienic reasons, must be frequently cleaned.

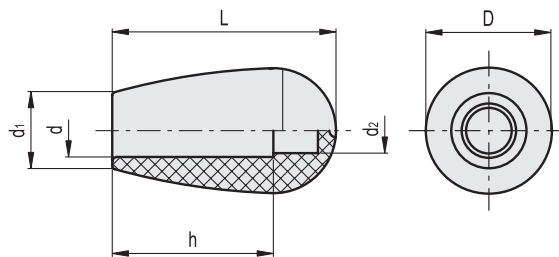

Its solid shape without cavities prevents unhealthy residues from depositing.

ASSEMBLY INSTRUCTIONS

Fit the handle onto slight chamfered shaft end and push as far as possible by hand or by means of a small press. Alternatively it is possible to tap the handle with a plastic or wooden mallet until firmly in place. In this case we strongly recommend to use a cloth or other suitable soft material over the product to avoid any surface damage.
